PROMAS CS

Automatisation/Software for the production

PROMAS CS

modular production management system for the automatization of processing, weighing, dosing, material management, order and batch management

APPLICATION

- ▶ Complete production management systems (PMS) or separate modules for full automatic processing (batch, conti, CIP) with easy-to-use direct click input, weighing module and stock management, dosing module and interfaces e.g. SAP present the scope of supply for the pharmaceutical, cosmetic, food and chemical industry.

ADVANTAGES

- ▶ Easy to operate e.g. – „direct click“ creation – of automatic processes, touch operation, etc.
- ▶ Clear and easy to understand systematic due to optimized systems for pharma, cosmetic, food and chemistry
- ▶ High reliability, multi-lingual internationally applicable
- ▶ Weighing system with manual, order related or chaotic selection
- ▶ Material availability, consumption and forecast analysis, material traceability
- ▶ Audit trail, administration of historical data, SQL server

QUALIFICATION AND DOCUMENTATION

- ▶ Developed according to the requirements of GAMP 4, FDA, V-Model
- ▶ Conforms to EU, FDA requirements (including 21 CFR Part 11)
- ▶ Multiple pharma installations in the US, Europe, Japan, South- and Middle America prove the quality
