

*When quality counts,  
we get it sorted*

*Sorting, inspection and feed systems  
for the pharmaceutical and the  
confectionery industry*

For more than 40 years now MASCHINPEX have been supplying their customers in the pharmaceutical and the confectionery industry with equipment to sort, inspect and feed their products.

## Inspection Systems

### □ VISOMAT I

Inspection belt for visual inspection of tablets, dragees and capsules with excellent cleanability.

### □ VISOMAT II

Turning belt for visual inspection of tablets and dragees with guaranteed safe turning of products.

### □ POLICAPS

Cleaning and polishing machine for hard gelatine capsules.

## Sorting Systems

### □ SORTOMAT 8D

8-lane sorting system for precise measuring and sorting of products according to thickness, diameter and length. Bipartite frame and swivelling roller frame for optimal accessibility, cleaning and maintenance.

### □ SORTOMAT 12S

12-lane sorting system for precise measuring and sorting of products according to thickness. One-part frame for mono-production.

### □ SORTOMAT 20

20-lane sorting system for measuring and sorting of products according to thickness. High performance sorting system for three-shift operation.

□ **VISOMAT IV**

Inspection machine for visual inspection of ampoules, carpoules, vials and infusion bottles.

□ **VISOMAT IV-S**

Inspection machine for visual inspection of syringes.

## Feed Systems

□ **TABLIFT D**

Mobile feed system with integrated sorting unit for controlled feeding of products into thermoforming and product counting machines.

□ **ELEVATOR**

Completely enclosed conveyor system for continuous feeding of sorting, inspection and packaging machines.

□ **LIFTOMAT**

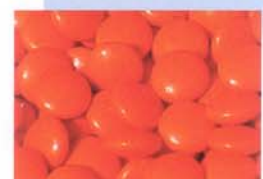

Stationary lifting column for dust-free loading of process and packaging machines. Container pick-up custom-built.

## Containers

□ **TABLET CONTAINER**

Storage- and transport container for raw and end products.

*At their new built production site in Wangen, in the scenic pre-alpine region near the Lake Constance, MASCHINPEX are continuing their expansion course.*

Enlarged production surfaces along with short communication paths between management and production enable the optimal processing of offers and guarantee reduced delivery. The care of projects from offer phase over project planning up to the final acceptance on their own premises assures that all specific customer requirements are met by all departments involved. An efficient stock keeping management and a well organised after-sales-service meet with the demands customers today make on a co-operative and timely partnership.

*The modern architecture and functional solidium of the new building eanable to adapt it to the always changing flow of work in the long term. These special constructional characteristics have made it the winner of a prize in 2003 that is awarded for »exemplary construction«.*
