LIM homogenizing mixers

for suppositories and lipstick products

APPLICATION

- ▶ „All in one“ mixer for melting waxes, direct processing of powders, homogenizing and exact temperature control
- ▶ Liquid/powder mixtures such as lipstick products or suppositories which require intensive mixing of the powder
- ▶ Sterile production

MIXING TECHNOLOGY

- ▶ Special, patented BECOMIX homogenizer for intensive homogenizing and grinding of powder/liquid masses with integrated CIP pump
- ▶ BECOMIX turbo dissolver for short melting times

EXECUTION

- ▶ Integrated CIP
- ▶ Direct suction of powder (no dusty pouring)
- ▶ Tiltable lid for easy addition of waxes
- ▶ Accurate temperature control
- ▶ Discharge free of residues
- ▶ Pressure tight, 3-walled, heating/cooling, insulated

PLANT ENGINEERING (OPTIONS)

- ▶ Individual solutions
- ▶ Load cells
- ▶ Touch-PC-system, automation

SIZES

- ▶ Capacity 60–500 litres
- ▶ Special sizes upon request
