

VISOMAT I

***Inspection belt for visual inspection
of tablets, dragees and capsules.***

Compact unit in GMP design. Excellent access for cleaning with tool-less assembly/disassembly. Wide range of accessories to meet with individual requirements.

Versatile Application

The VISOMAT I is used for visual inspection of tablets, dragees and capsules according to cosmetic defects such as spots, cracks, scratches, warts, missing corners and similar.

Efficient Operation

The visual inspection of the product is effected by one or two operators. The steady rotation of the inspection rollers ensures that the product is continuously being rotated in front of the operator. In combination with a mirror mounted on the opposite side a safe and reliable all-round product inspection is granted.

Inspection of transparent
hard and soft gelatine
capsules using
trans-illumination.

Plug-in type inspection
rollers for tool-less
assembly/disassembly
within a few minutes.

Major Advantages

- Ergonomic working place with specially formed arm rests, sufficient knee space and control elements in reach of the operator.
- Continuous visual monitoring of the hopper fill level through transparent hopper front side.
- GMP design with excellent access for cleaning and tool-less assembly/disassembly of product contact parts. Smooth surfaces without hidden corners to avoid product traps.
- Rejection of defective products manually or by a suck-off pipette.
- Perforated vibratory feed chute to reject dust and coarse particles prior to inspection.
- Inspection rollers available in various surface qualities to ensure an optimal individual adjustment to the product to be inspected.
- Ideal in combination with MASCHINPEX capsule polishing machine POLICAPS.

Technical Data VISOMAT I

- The MASCHINPEX product range includes:
- Inspection Machines
 - Sorting Machines
 - Outside Washing and Decontamination Machines
 - Capsule Polishers
 - Feed Systems
 - Containers

Output

Up to 120.000 products/h – depending on product and inspection criteria.

Inspection rollers

Plug-in type design.
Various surface qualities available.

Feed hopper

20 litres

Working height

approx. 900 mm, adjustable

Electricity

230 V, 1 Ph + N + PE, 50 Hz,
approx. 0,9 kW

Dimensions

1265 x 500 x 1235 mm
